ABOUT

Over the last four years I have explored a wide range of areas in tech. From Full Stack Web Development, then SEO, and for the past six months I have been deep in the latest AI tools and systems, working with Claude Code, Coworker, N8N workflows, open source LLMs, building products and more.

Because I have worked across design, content, and code, I have a well-rounded sense of how things actually come together. I understand how products get built, what makes AI work effectively in the real world, and what good design and content look like from an LLM and search engine perspective. I have deployed live websites and worked on VPS environments.

Right now I want to use all of this to work on AI systems, workflows, and products that solve real problems for real people.

EDUCATION

Agentic AI Development (Weekend only) | Saylani Mass I.T Training (SMIT)

February 2026 to December 2026 | Karachi, Pakistan

- Hands-on certification focused on building and deploying AI agents
- Covers agent design, automation workflows, API integration, and real-world AI systems

Bachelor's Degree, Computer Science | Millennium Institute of Technology and Entrepreneurship (MITE)

September 2024 to September 2028 | CGPA: 3.8 / 4.0

- Core Computer Science including software engineering, data structures, and systems design
- Awarded 3rd Prize at Geekathon 2025 hosted by MITE University

EXPERIENCE

Web Developer Intern | IIT Solutions

March 2024 to August 2024 | Qasimabad, Sindh, Pakistan

- Built a complete educational website from scratch using PHP, MySQL, HTML, CSS, and JavaScript
- Designed and developed 5 main pages with clean navigation and mobile responsive layout
- Applied animations and UI techniques to improve how users interact with the site
- Optimized database queries and server side scripts for better performance

SEO and WordPress Developer Intern | TechTalks.pk

April 2025 to June 2025 | Remote

- Managed and grew a WordPress platform with a focus on performance and search visibility
- Applied on-page and off-page SEO strategies to increase organic traffic
- Improved Core Web Vitals through caching, database tuning, and asset optimization
- Used Google Search Console and Analytics to track results and make data-driven improvements

Web Developer Intern | CodSoft

November 2023 to January 2024 | Sindh, Pakistan

- Built responsive websites using HTML, CSS, and JavaScript
- Developed and customized WordPress sites with plugin integrations
- Worked directly with designers and developers to deliver projects on time

PROJECTS

Real-Time Market Rate Board for Brokers | Next.js, Socket.IO, real-time data | Currently building

- Building a live rate display product for brokers, pushing real-time market rates to a clean web interface
- Live at: rateboard.innoventix360.com/b/jb-brokers

Innoventix360 Website with AI Chatbot | Next.js, AI chatbot integration | Completed

- Built a full company website using Next.js to market standards
- Integrated an AI chatbot to handle visitor queries. Live at: innoventix360.com

WhatsApp AI Agent with Admin Panel | Personal project

- Built a multilingual WhatsApp AI agent that handles customer service automatically
- Includes a separate frontend panel showing conversation stats and activity, letting small businesses run 24/7 support without human involvement

SKILLS

- AI Agent Development and Workflow Automation, N8N Workflow Design and API Integration
- Claude Code and Coworker, Open Source LLM integration, FastAPI backend in Python
- Web Development using HTML, CSS, JavaScript, PHP, WordPress, and Next.js
- Product Development from idea to deployment, Graphic Design and UI/UX Design
- SEO and content strategy for both search engines and LLMs, VPS deployment and server management
- Database Management using MySQL and Cloud Firestore; Firebase, Netlify, and Vercel for hosting

CERTIFICATIONS

- Agentic AI Fundamentals: Architectures, Frameworks, and Applications — LinkedIn Learning, January 2026
- Introduction to Next.js — fundamentals, server-side rendering, and modern React-based web development

PUBLICATIONS

- A Systematic Global Comparative Review of Cyberattacks — a global comparative analysis of cyberattack trends, methods, and impacts
